

Environmental Policy Statement

Winchcombe Farm is situated in an Area of Outstanding Natural Beauty on the outskirts of the beautiful Warwickshire village of Upper Tysoe.

Each holiday lodge is surrounded by glorious open countryside and we believe we have a responsibility to take care of this and ensure that it thrives for future generations.

Our business is built around enabling our guests to immerse themselves in the natural environment and therefore it is our responsibility to protect it.

We want all guests to enjoy their stay with us in the knowledge that we are managing operations in harmony with the environment.

We appreciate that all activities have an impact on the environment; however we will embrace this policy to play our part in helping to save our beautiful planet.

Our commitments are:

- To ensure that all the lodges harmonise with the natural environment so that it continues to flourish;
- To maximise the use of local suppliers wherever possible;
- To use renewable energy whenever possible;
- To be committed to reducing and preventing waste and finding the best ways to reuse and recycle in an environmentally friendly manner;
- To continually monitor our carbon emissions and invest in technologies and, where financially viable, to reduce them;
- To protecting the wildlife on the farm and enhance their habitat wherever possible.
- To empower our staff to manage work processes to lower the environmental impact it has; and
- To reduce, as far as reasonably practicable, our use of natural resources and the volume of waste produced.

We comply with all relevant environmental regulations and review this policy annually, making our findings available to guests through our website and social media channels.
